Alberto Santos Jr., General Manager Las Lomas Ranch, Owner of Santos Ranch LLC

Prime Southtexas Brush

This secluded ranch has a wide variety of deer and turkey habitat. Las Lomas Ranch is hidden in the south east corner of Frio county. The ranch bordered by some the largest ranches in the county. You need two keys to gain access the ranch: One key to get access to the all weather road leading to the ranch and one for the ranch itself. There is no through traffic on the ranch. This means our wildlife is undisturbed throughout the year and our guests are the only beneficiaries of the feeding and game management programs.

The topography is diverse and includes wooded creek bottom, mesquite and pear flats, and rocky hills. The vegetation is classic southtexas brush country and includes live oak, elm, and hackberry along the San Miguel Creek on the south of the property and southtexas deer favorites like black brush, guajillo, four wing salt brush, southwest bernaria Texas kidneywood and granjeno. The heavy brush is the favorite cover for large mature bucks and turkey.

Wildlife Management Program

Wildlife management program produces quality game Las Lomas Ranch deer herd depends on an abundance of natural high protein Forbes and browse (woody plants and seeds).. We also have food

plots and supplement with protein and corn throughout the year. Turkey enjoy the special wildflowers that attract juicy bugs and produce seeds. Water is abundant and dispersed throughout the ranch. Deer and turkey counts are taken each year and become the basis for the harvest quota that is set for each season.

Only a limited number of mature bucks are taken each year and our gobblers are only hunted in the spring.

Other animals also benefit from the deer and turkey management program. Other seasonal game that is also hunted include doves and quail. Feral hogs, javalina, bobcats and coyotes are hunted year round.

Guided Hunts

The owner personally will guide you on your hunt. Born and raised in southtexas, the owner hunts all around the world for birds and big game but his favorite place to hunt is right here in southtexas.

The lodge will be ready by fall of 2004. In the mean time guests can stay in nearby Pearsall or are welcome to camp on one of our many wills with spectacular vistas.
